# TERRA GALAICA

Beyond The Way

ORÍGENES  
*Tu viaje comienza*

*Since time was time, our ancestors have been guided by a compass, an inner lighthouse, which has brought them to the end of the known Earth. Inspired by the celestial vault, here they built sacred spaces from which to connect with the divine, from which to consecrate themselves to Father Sun and Mother Earth, honoring natural cycles and making offerings to fertility.*

*Place of bards and meigas, where the mouras and their legends live, where the Romans built temples to their gods and the Templars hid their relics brought from the Holy Land. All of them following the solar movement, to find the secret of alchemy, the promise of the Grail.*

*Travel and discover with us this ancient Earth, connecting with its wisdom, with the force of its nature and with its original call. Feel the telluric energy that surrounds the sacred places and its beautiful melody that remains latent in the stone. Bathe in its thermal, magical and medicinal waters that maintain the healing powers of yesteryear.*

*Accompanied by guardians of history, tradition and ancient knowledge, we will embark on a unique journey where history, myth, legend, past and present merge into **a unique experience that will take you back home, back... to the Origin.***

## COMPANIONS

---

**José Carlos Hermida.** Environmentalist, coach and adventurer, since I was a child I have had a passion for nature, for traveling and for the stories that told this world in a different way. Legends, mythology and everything that I felt is yet to be discovered beyond ordinary life, have always attracted me powerfully. In my journey I have sought to understand the origin of the people and their oldest traditions, and to connect with the heartbeat of the planet. The practice of chi kung and humanistic disciplines have given me a greater understanding of the human being and a deep respect for Mother Earth.

**Davide Rampino.** Traveler, impatient nomad and adventurer, I have always felt attracted to the most exotic, atypical trips, rich in ancient cultures, far from urban and crowded spaces, and always immersed in nature. Contact with the authentic, the natural and the ancestral has been a constant element of all my discoveries. Travel and life experiences in countless places have contributed to developing in me a very open vision of the world and people, cultivating interest and passion for entire centuries of ancient culture and wisdom.

Remembering again all these ancestral memories, being able to teach them and keeping them alive are today her greatest motivations.
